

AQMEII-4 Activity 3 Participant Call – November 23, 2021

Attendees: Jesse Bash, Colleen Baublitz, Paul Makar, Christian Hogrefe, Olivia Clifton, Jon Pleim, Johannes Fleming, Roberto San Jose, Kirsti Ashworth

- New log in screen

- If you already have a WAA ID and password from earlier, select the WAM tab and use your current log in for now
- New users should create a login.gov account
- Everyone must start using the login.gov approach after 12/31/2021 (but can start sooner)
 - To make your login.gov account
 - Step 1: Using your EPA-issued username/password, login to the EPA Web Application Management Dashboard and click **User Profile** to verify the email address associated with your account.
 - [How to Lookup EPA WAA Community Email Address.](#)
 - Step 2: [Create a Login.gov account](#) (You must use the same email address found in Step 1.)
 - **NOTE: If you already have a Login.gov account you can change the email address in your EPA User Profile to match your current Login.gov email address in Step 1.**
 - Step 3: Follow the instructions [here](#) to link your Login.gov credentials to your EPA application account.
 - Once you have completed this three-step process, you may go to the desired application and use your new Login.gov credentials to more securely login to EPA resources.

- Donna will share the AQMEII4 GoAnywhere folder with everyone this week as the sharing process has changed from when we first started the site. You will get an email notifying you that the site has been shared with you. This **should** make it so you have continued access with the login.gov account.
- Participant updates
 - Summary of upload status
 - Uploaded (but may need to be rerun)
 - CMAQ/STAGE (Jesse)
 - ECCC (2 models) (Paul)
 - Modeled all and did not consider AQMEII flag
 - IFM (Johannes)
 - UPM (Roberto)
 - Upload soon
 - CMAQ/M3DRY (2 models) (Jon)
 - AQMEII flag usage
 - Flag indicates outliers in the observed vd, driving data may be ok
 - Olivia expects modeled values if the driving data is available even if AQMEII flag is not 1
 - Please rerun if this is not the case
 - Output file format
 - CSV
- Presentation of results
 - STAGE (Jesse)
 - IFS (Johannes)
- Publication plan (Olivia, Chris)
 - Olivia will take the lead on an overall comparison of the models
 - For December call; participants please provide a short description or outline of planned papers
- Upcoming calls
 - December call - move to 12/21
 - January call as scheduled
 - February extended call (Doodle poll to be sent out)
 - Include observationalists
 - Discuss each site (1/2 - 1 hr per site) with goal to ask questions of observationalists and seek coherency in what we're finding/understanding for each site
 - March extended call (Doodle poll to be sent out)
 - Include observationalists
 - Focus on publications
 - Each lead author provides a 20 minute overview of paper
